Good King Bob

The castle grounds

Kings Pride soft leaf buffalo grass

A Royal welcome for Kings Pride

Live a King's life.

Imagine a totally new Australian soft leaf buffalo grass that is greener for longer, softer than ever, yet even more hard-wearing. A grass that looks better, performs better and allows you more time to enjoy your lawn and your life.

Kings Pride is redefining what makes a good lawn truly great.

National trials* have demonstrated that **Kings Pride** delivers a softer, greener, harder-wearing lawn all year round, whilst saving on time and effort on maintenance. And what's more, it was first discovered growing wild – what better proof could there be of its natural ability to thrive in Australia's testing climate?

*A National Trial study has been conducted with the Department of Primary Industries, involving blind testing 14 varieties of buffalo grass at sites across Australia. For the last three years, **Kings Pride** has consistently been rated in terms of performance in the top group and is quite frequently number 1.

Surveying my kingdom

Heirs to the throne

A royal banquet

Roll out the green carpet

Superior look and covering – including low thatching

Colour in the heat of summer

Colour in the middle of a mild winter

Shade tolerant
